

Cumulative Index of the *Journal of the American Planning Association* Volumes 55-59, 1989-1993

This index includes the issues of the *Journal* from Volume 55 to 59, 1989 to 1993. It is the first compilation to appear since the cumulative index of 1988 (54, 4) and covers the tenure of the coeditors Eugenie L. Birch and Peter D. Salins. The index was prepared under the capable hands of Catherine P. LaFata, graduate student in planning at Hunter College, and editorial assistant Athena Chin. The index consists of four sections. The first is a subject index, which lists all articles, by title only, that fit into each category. An article may appear in more than one category. The categories are listed below. Articles that appeared in the various departments are identified by the appropriate

department initials: Longer View (LV), Planner's Notebook (PN), Computer Report (CR), Commentary and Counterpoint (CC), and Legislative Watch (LW).

The second section is an alphabetical listing of all articles, by title and author(s). In the case of multiple authors, the complete citation appears in the listing for the first author; subsequent authors carry a "see" designation. The third section contains an alphabetical listing of all books reviewed, including those that appeared under the heading Briefly Noted, and a list of the authors of books and reviews. The final section lists letters to the editors.
